

Blood Armor Medic

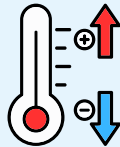

CAPACITY

3-8 units of whole blood

TEMPERATURE

1-10°C

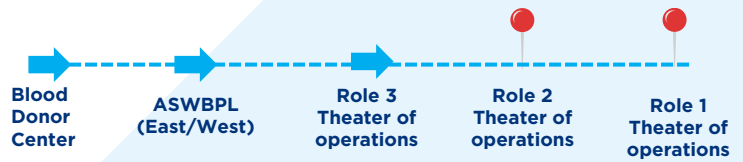

DURATION

3 Days

**QUALIFIED FOR EXTREME
ARCTIC & DESERT HEAT
CONDITIONS**

Unmatched Performance

Designed for extreme military exigencies, the Blood Armor Medic guarantees whole blood integrity even under severe conditions. Its robust construction with a durable fabric exterior and integration-ready Molle system ensures it meets combat standards without faltering.

Reliable Cooling Technology

The Blood Armor Medic features proven passive cooling with vacuum insulation panels and hybrid phase change materials, doubling the thermal efficiency of traditional methods. Its design accommodates easy storage and reconditioning within constrained spaces such as in blood support detachment units and forward operating bases, crucial for operational readiness.

Multi-Role Capability

Uniquely designed for varied missions, the Blood Armor Medic supports the need of everyone from special forces to emergency medical teams. Whether carrying three units for three-day missions or six units in urgent medical evacuations, it adapts seamlessly, enhancing operational flexibility in blood transport.
