

CorneaPack

Powered By MaxQ

SUPPORTING THE JOURNEY BEHIND RESTORING SIGHT

Besides temperature requirements, corneal tissue transport carries the responsibility of donor stewardship, operational coordination, and helping ensure tissue arrives ready for the next step in restoring sight.

Reliable Cold Chain Performance:

Maintains precise 2-8°C temperature for up to 72 hours, ensuring safe arrival of corneas during domestic and international shipments.

Designed Around Eye Bank Operations:

Built to support streamlined implementation with minimal workflow disruption.

Lower Shipping Impact:

Lightweight and operationally efficient to help reduce shipping costs and environmental impact.

CorneaPack was refined through conversations, feedback, and collaboration with eye banking professionals to support the realities of modern tissue transport workflows.

CAPACITY

3-6 Corneas

TEMPERATURE

2-8°C

QUALIFICATIONS

48-72 hours (Domestic)
96-120 hours (International)
